

The GME System

Clinical Activity Tracking

Residents capture clinical activity records at point of care.

Utilizes:

Handheld Devices
E-mail
PC

Features:

Secure
User Friendly
CPT Coding
Program Specific

Clinical activity tracking is simplified in The GME System. Using common handheld devices, entry takes place at point of care. Resident entry is simplified and streamlined through the creation of program specific "profiles". Procedures are codified using CPT codes and all other data is defined by each program to facilitate easy entry.

All data collected is downloaded to the common database for review and historical retention.

Secure

Patient sensitive information is kept secure
Resident must log in even to handheld device to ensure security

User Friendly

All records are captured via handheld device
Entry screens are streamlined with pick lists and other features
Pick lists are tailored to each program

CPT Coding

Procedures are codified when entered
CPT lists are tailored to each program

Program Specific

Each program tailors the system to their focus
Pick lists are tailored to each program
Management of data is handled by each program
