A complete Duty Hours Tracking system is part of The GME System. Detailed time records and robust reporting mechanisms make this the most powerful duty hours tracking system available. Organizations can now pro actively manage residents' time and adjust scheduling based upon real data collected just hours or days before.

Complete reporting capabilities including E-mail messaging for proactive management of Residents' time.

Secure

Personnel see only those residents they manage
Robust security model allows tailoring of reporting and applications

Integrated

Utilizes demographic and residency program data already collected

User Friendly

Residents can utilize Palm handheld device, Web or a department PC
Simple entry with customization of locations and activities
Each program specifies appropriate activities and rotation locations

E-mail Integration

Reports automatically generated and E-mailed to personnel
Document previous week's activities and time specific to each resident
Summary reporting available for GME or administration

Data Immediately Available

All data collected is available for reporting immediately
All data captured in one database
Palm time records are downloaded to database
Ensures and enables accurate and timely information

Scheduling Management

Residents' schedules can be adjusted based upon information collected
Data analyzed is up-to-date from previous week

Activity Specific

Organization builds custom activity list
Enables discrimination between different activities
Differentiate at home on-call from inpatient on-call

Location Specific

Location is also captured in entry along with activity
Capture moonlighting activities within the health system and external
Data is specific, accurate and valuable

Collaborative. Informative. Intelligent.
