

The GME System

Reimbursement Reporting

Create IRIS files at the touch of a button. Accurately substantiate and submit cost reports.

Features:

Integrated

Handles Multiple Providers

Uses Rotation Schedules

Uses Real Time

Activity Specific

Location Specific

IME and GME Framework

Excludes Non-Accredited

Encompasses Leave

Ensures Accuracy

The GME System facilitates a collaborative effort from multiple departments in the management of GME and the benefits are enormous. One of the key areas of ROI is reimbursement reporting. Transactional data captured in the day to day operations of GME is leveraged to produce accurate and timely reimbursement reports without necessitating concerted effort from reimbursement analysts.

Leverage data already captured by other departments to create and document reimbursement reports EASILY.

Integrated

Utilizes demographic and residency program data already collected

Handles Multiple Providers

Using location logic, reimbursement is specific to provider

Ensure that residents activities are not submitted more than once

Each provider creates specific reimbursement files from one database

Uses Rotational Schedules

Reimbursement reports can be created from rotational schedules

All rotational schedules are created electronically within The GME System

All data is up to date and accurate

Uses Real Time

Reimbursement reports can be run from actual time records as well

Flexible to run from either rotational schedules or real time

Activity and Location Specific

All scheduling and time data is specific to location and activity

Creates pinpoint accurate data and reimbursement reporting

IME and GME Framework

Complex reimbursement ratios defined with IME and GME factors

Rules can be defined by activity or specific to location

Excludes Non-Accredited

While non-accredited program data is captured, it is excluded

Other program specific reimbursement flags are utilized

IME only and cap IME at GME flags can be set

Encompasses Leave

Leave types can be defined as reimbursable or non-reimbursable

Ensures Accuracy

Programs are built with specific reimbursement rules

Activities and locations are built with specific reimbursement rules

Reimbursement reports are created with pinpoint accuracy

All supporting data is captured and retained
