Scheduling is an integral part of The GME System. The user friendly interface is very similar to Microsoft Outlook, Lotus Notes and the other popular PIM (personal information management) applications available today. All relevant activities and locations specific for a program are immediately available and residents can be scheduled in a snap.

Schedules are immediately available to residents on-line via the web, complete with document sharing.

Secure

Personnel see only those residents they manage

Residents can see only their own schedule

Integrated

Utilizes demographic and residency program data already collected

Adheres to rotational switch date schedules defined for each program

User Friendly

Interface is familiar with several time-saving features

Recurrence of schedule is easily maintained

On-call, conference and rotation scheduling are all facilitated

Web Integration

Schedule is immediately available on-line for residents

Resident can obtain detailed information regarding each event

Document Sharing

Documents can be attached to events

Documents are immediately available to residents via web

Block Scheduling

Easy scheduling of residents by rotation periods for the entire year in one color coded view

Easily view the curriculum coverage of each resident

Quickly view the number of residents scheduled at each rotation location

Collaborative. Informative. Intelligent.
