Delivery of The GME System has options that are tailored to your organization. The system can exist in-house on your organization's equipment and infrastructure (traditional licensing) or can be delivered directly from our hosting facilities (ASP licensing). The system operates on standard and readily available hardware and software platforms.

Flexible. Reliable. Advanced.
All hallmarks of The GME System.

ASP Delivery

Akcia "serves" the application from our hosting facility
Akcia is responsible for all server hardware
Akcia is responsible for all Internet connectivity to server
Akcia is responsible for all server licensing
Akcia supplies knowledgeable personnel available for support

Traditional Delivery

Client provides and maintains infrastructure
Client is responsible for all server hardware
Client is responsible for all Internet connectivity to server
Client is responsible for all server licensing
Client provides knowledgeable personnel for support of infrastructure
Akcia supports client's in-house IT staff

Architecture

Web applications developed using Microsoft ASP.Net
Client server applications developed using Microsoft Visual Basic 6.0
Handheld applications developed using AppForge MobileVB 3.0
Data server utilized is Microsoft SQL Server 2000 or later

Server Hardware Requirements

Varies depending on scope of user population
Minimum server requirements
Pentium III 600 MHz single processor or greater
512 MB of RAM
40 GB RAID 1 or greater array
Able to run both data and web server on same hardware

Software Assurance

Akcia stands behind its products and we are committed to our clients
All software updates are included
Technical assistance for both Server and Client IT personnel

Collaborative. Informative. Intelligent.
